## Our Vision

To be the leading offshore and marine services operating company with solution-driven design and execution at competitive cost, promptly and at high quality standards achieved in perfect safety in Africa and worldwide.

## Our Mission

To deliver precision marine services and offshore project in the utmost safety to the benefit and enhancement of humanity and to also protect the eco-system from damage in the course of achieving the Client's specification and goal.

# Dredging Atlantic Limited

## Who We Are

DAL engages in the execution of dredging contracts and associated land reclamation works in the territorial waters of Nigeria. Its dredging and reclamation services include pre and post survey works, design of the construction environment management plan, monitoring for compliance, and proactive QHSE program.

The company also undertakes various marine construction projects and geotechnical works; excavation offshore reclamation contracts; services for developing water installations for marine facilities, and excavation contracts; and drilling and deepening waterways, ports and marine installation.

Dredging Atlantic Limited was formed to offer and deliver on large scale marine / off-shore engineering projects in an ensured quality, safety and on time and within budget projects to meet the expectations of our clients. Execution of work with the state of art and modern equipment is our hallmark.

DAL has the ability to form successful joint ventures with key specialists sub-contractors to offer an all inclusive range of services to deal with the most complex type of marine project.

DAL undertakes the processing and re-use of appropriate materials to offer the most environmentally friendly action and methods are used for the benefit of the project and clients.

## HSE MANAGEMENT SYSTEM

The Health, Safety Management Plan is an integral part of all work and site specific procedures for all operations. Dredging Atlantic Limited is committed to developing safety systems which ensure the highest standard of health and safety for all employees, third parties relevant to project and Client with its representatives.

We aim to continually improve the systems of work and strive for the best practice in the area of health, safety and environment. DAL aims to control risk through the implementation of an effective Health and Safety Management plans and program outline.

The Health, Safety Management plan and program outline the objectives, responsibilities and work standard in all areas of Operations. The plan establishes targets that ensures safety compliances of DAL's procedures as well as adherence to Client and legislative requirements.

The Health and Safety plan will meet and where possible exceed the following Local, National legislation and International standards

DAL demonstrates its commitment to health and safety by making all levels of Management accountable for Health, Safety and environmental policy across site locations and ensures the policy is communicated to all employees and management.
